Zollverein UNESCO World Heritage Site

Hundreds of coal mines produced coal in the Ruhr Area, but only one was declared a UNESCO World Heritage Site in 2001. For good reason: the Zollverein coal mine is a masterpiece of mining architecture and a completely preserved synthesis of the arts. Zollverein is regarded as the "most beautiful coal mine in the world".

The famous pit head frame stands for the transformation of an entire region. On guided tours the unique industrial architecture and the huge area can be explored. The Zollverein Park invites visitors to relax, exhibitions are shown in the halls, and festivals take place in the midst of the impressive facilities.
